**Your own ,super-charged‘ space – either at home, at work, while sleeping or while travelling.**

Ground water flows below the ground, faults in the earth’s crust and also the network of global meridians all create the normal ‘vibrational’ framework within our earth’s magnetic field. However, these frequencies can also have a negative effect on our own regulatory systems.

A quadrant formed with the AkuRy Travel Set cubes provides perfect geometric alignment and harmonises any harmful electromagnetic interference. Each cube is energized and so it considerably increases the energy within its range of field. One of the additional benefits is that the energy level of the surrounding area is also significantly raised.

As a result, using the AkuRy Travel Set, you can create your own place of ‘powerful energy’ – your own ,super-charged‘ space.

The portable AkuRy Travel Set provides protection within an area of 2.50m x 2.50m. It is generally used for energetically improving conditions whilst you stay in a hotel room; or perhaps you may choose to use the cubes to harmonise and energize your own individual work area, treatment area or even your own areas of rest and sleep at home.

Note: Our glass cubes have ground and polished edges. However, they can get damaged when the glass edges of each individual cube knocks against each other. We therefore recommend that the cube is always carried in our compartmentalised foam-packaging to keep them separate.
